1.GitHub

Create a Github Account:

https://github.com/

Create Repositery with name and add readme file

2.Django changes

A.Setting.py

ALLOWED_HOSTS = ['.vercel.app']

B.Terminal

pip freeze>requirements.txt

requirements.txt

asgiref==3.8.1

Django==4.1.5

sqlparse==0.5.2

tzdata==2024.2

C. create Json File in project

```json
{
    "builds": [{
        "src": "djangoprojectname/wsgi.py",
        "use": "@vercel/python",
        "config": { "maxLambdaSize": "15mb", "runtime": "python3.9" }
    }],
    "routes": [
        {
            "src": "/(.*)",
            "dest": "djangoprojectname/wsgi.py"
        }
    ]
}
```

D. in wsgi.py file add line on last

3.Create Vercel Account and import Github

https://vercel.com/
